Experienced Security Professional (5+ yr) skilled in vulnerability research and penetration testing with a strong passion for security-at-scale. Good at solving complex technology problems, and built tools to automate manual efforts.

PROFESSIONAL EXPERIENCE

- Amazon** **India**
Security Engineer *Aug 2022–Present*
 - Performed full stack product security review for 5+ applications that are already in production and found 20+ vulnerabilities of different severity and worked closely with dev team to provide optimal patch that lead to increase their security by 30%.
 - Leveraged Semgrep Engine to perform variant analysis on existing manual identified vulnerabilities to scale variant hunting across multiple packages which are hard to surface using existing automated tools.
 - Obtained a Accolades for handling and mitigating sev2 application security vulnerabilities in production.
- VMware** **India**
Product Security Engineer *May 2021–Aug 2022*
 - Mitigated 10+ Critical vulnerabilities at the design phase through threat modeling across multiple products and helped in reducing the attack surface by 40% with a long-term threat mitigation plan.
 - Through security code review and vulnerability research reported 20+ critical and high severity vulnerabilities affecting multiple on-prem and SaaS products. Worked closely with the developer to provide defense in depth mitigation to future proof the product and limit the attack's blast radius.
 - Taken responsibility to eliminate more than 10+ bug classes across multiple products by enforcing secure default code patterns and hardening infra.
 - Developed custom tools in python and go as part of the automation initiative led by me to find dependency confusion and other common vulnerabilities code patterns.
- ServiceNow** **India**
Product Security Engineer *Feb 2021–May 2021*
 - Identified 1 critical deserialization vulnerability and 3 high severity vulnerabilities in the ServiceNow Core platform through Security code review. Worked closely with Dev to provide defense in depth security fixes.
 - Delivered talk on common vulnerability and code patterns to educate developers as part of the security champion program.
- OpenText** **India**
Software Engineer *Oct 2019–Feb 2021*
 - Developed multiple features for OT healthcare SaaS and containerized its services to reduce down and increase performance by 30%
 - Lead the infrastructure migration for critical patch delivery service which increased availability and security to 50%
 - Lead for security code review for all services and conducted office hours on finding security vulnerabilities through code audit as part of developer education.

PROFESSIONAL ACCOMPLISHMENTS

- Certifications: OSCP, HCNA, CKAD, AWS Developer
- Published CVE-2022-1553 for a critical Auth bypass in OSS and Contributed secure code to multiple OSS projects
- Submitted bugs to Paypal, Snapchat, Librepay, Upwork, Twitter through their bug bounty program.
- Documented Vulnerability research and critical Pentest finding in my **Blog**: <https://mah1ndra.github.io/>.
- Part of **Synack Red Team** - Perform Red Team engagements on provided IP ranges and submit vulnerabilities.
- Awarded Elevate our best award at VMware for evaluating Log4j and patching multiple products through automation in a very short span and secure critical Federal and healthcare Infrastructure.
- Well versed in Securing OAuth, OpenID, SAML, JWT Implementations and service oriented architectures, web, Mobile.
